

# Climate change effects on northern Ontario & natural resources

**Date:** Tuesday September 11, 2018

**Time:** 1:00pm-2:00pm EDT (please note your time zone)

## Description

The webinar will present up-to-date science and information on climate change effects on northern Ontario's natural resources, including forests, fisheries, wildlife and peatlands and permafrost.

*This webinar is presented by the Northern Climate Change Network (NCCN) – a working group of five municipalities in northern Ontario who are collaborating to develop innovative solutions to prepare and adapt to the impacts of climate change.*

## Presenter

**Jenny Gleeson** is the Senior Climate Change Program Advisor for the Ontario Ministry of Natural Resources and Forestry. Previously with the MNRF, Jenny worked with the Renewable Energy Program. Jenny has been involved in international, national and provincial climate change policy and actions for over 10 years including working with the International Institute for Sustainable Development on climate change mitigation and adaptation issues. She holds an MA in International Development Studies from the University of Amsterdam and a BA in International Development Studies and Environmental Resource Studies from Trent U.
